

Muhammad Uvais Akram

Full Stack Developer (MERN) | React.js | Node.js | Express.js | MongoDB | JavaScript
+91-9520045563 | uvaisakram95@gmail.com | Okhla, Abu Fazl, Delhi, India | [GitHub](#) | [LinkedIn](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

Fresher MERN Stack Developer skilled in React.js, JavaScript, Node.js, Express.js, MongoDB, REST APIs, authentication, responsive UI design, and full-stack application development. Built an Airbnb-style rental booking platform and currently building SigmaGPT, an AI chat application with thread-based conversations, MongoDB message storage, and Google GenAI API integration. Strong foundation in OOP, DSA, API integration, Git/GitHub, and debugging, with internship exposure through CodeAlpha and Deloitte.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, Python, HTML5, CSS3
Frontend: React.js, Redux, Context API, React Router, Tailwind CSS, Bootstrap, Responsive Web Design
Backend: Node.js, Express.js, REST APIs, MVC Architecture, Middleware, Authentication & Authorization, JWT, Session-based Auth
Database: MongoDB, Mongoose, MongoDB Atlas, CRUD Operations, Schema Design
Tools: Git, GitHub, VS Code, Postman, npm, Vite, Render, Cloudinary, Chrome DevTools
Core Concepts: Data Structures & Algorithms, OOP, API Integration, Debugging, Deployment, Problem Solving

PROJECTS

Wanderlust - Rental Property Booking Platform MERN Stack, Cloudinary, MongoDB Atlas	Completed
- Built an Airbnb-style full-stack rental platform with listing CRUD, authentication, authorization, reviews, search, categories, image upload, and booking management. - Implemented secure user flows with protected routes/middleware, ownership checks, form validation, and session-based access control. - Integrated MongoDB/Mongoose schemas for users, listings, reviews, and bookings; handled relationships using population and cascade logic. - Added responsive UI, search/category filtering, geolocation/map support, Cloudinary image storage, and deployment-ready environment configuration.	
SigmaGPT - AI Chat Application MERN Stack, Google GenAI API, MongoDB	In Progress
- Building a ChatGPT-style application with Express.js backend APIs for creating, reading, and deleting chat threads. - Implemented MongoDB data models for thread-based conversations with user and assistant messages, timestamps, and sorted chat history. - Integrated Google GenAI API to generate assistant replies and store responses in MongoDB for persistent conversation history. - Current work: developing React frontend with sidebar, chat window, Context API state management, API integration, and responsive UI.	

EXPERIENCE

CodeAlpha - Full Stack Developer (MERN) Intern, Remote	Jul 2025 - Aug 2025
- Developed responsive web applications using React.js, JavaScript, Node.js, Express.js, MongoDB, Tailwind CSS, and Bootstrap. - Built reusable UI components, integrated REST APIs, and improved frontend workflows with mobile-first responsive design. - Used Git and GitHub for version control, feature development, collaboration, and project documentation.	
Deloitte - Software Engineering Intern, Remote	Sep 2025 - Oct 2025
- Solved medium-level programming problems using Java, OOP, and Data Structures & Algorithms concepts. - Improved code quality through debugging, modular logic design, and optimization for time and memory efficiency. - Practiced professional software engineering workflows including problem analysis, clean code, and structured solution building.	

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University - B.Tech in Computer Science Engineering CGPA: 7.61	2022 - 2026
RPS Bijnor - 12th (CBSE)	2021 83%
VIA Muzaffarnagar - 10th (NIOS)	2019 58%

ACHIEVEMENTS & CERTIFICATIONS

- Runner Up - CodeAlpha Hackathon for building an interactive web solution under strict deadlines.
- Research Paper Presenter at IC-EDSES 2025 International Summit.
- Certified in Full Stack Development by CodeAlpha and Java Programming by Deloitte.
- Active problem solver on LeetCode, focusing on logical thinking, DSA, and algorithmic problem solving.
